Installation Options

Select the program features you want installed.

☒ **Sentinel EMS**

Sentinel EMS is the Entitlement Management System of Sentinel LDK. It is a back end component used for license generation and management. You need to install EMS on at least one machine. This can be either a server, the machine used for integration of licenses and protection, or both. For more details, see the [Sentinel LDK Installation Guide](#)

☒ **Sentinel Vendor Suite**

Sentinel Vendor Suite includes all Sentinel LDK development tools - including the Envelope automatic protection tool, the Toolbox API generation and exploration tool, all API samples and interfaces and more. Sentinel Vendor Suite must be installed for integration of licensing and protection into your application.

Sentinel EMS Setup Type

SENTINEL
SOFTWARE
MONETIZATION
SOLUTIONS

☒ **Express**

Uses default configurations. Creates a new SQL Server instance - EMSDATABASE, or reuses if already available

☐ **Advanced**

Requires an active instance of SQL server, running locally or on a remote machine. Allows you to change default settings.
